THE SIXTH FORM

The Sixth Form at Watford Grammar School for Boys (WBGs) is large by most standards, with currently around 205 students in each of the Lower and Upper Sixth. Studying A Levels here has a number of advantages.

A National Reputation

The School has a national reputation for academic excellence. Each year, 99% of those leaving the Upper Sixth go on to university, the substantial majority to Russell Group universities, including a good number to the colleges of Oxford and Cambridge. The School's reputation is founded on a long tradition of excellence sustained by highly qualified and committed teaching staff as well as excellent facilities.

A Wide Range of Activities

The School offers a wide range of activities beyond A Level study. It is particularly strong in sport, with full fixture lists against the strongest schools in the area, and a significant number of our students regularly appear for county, regional and even national teams. Debating, chess, drama and music are other areas in which the School enjoys a national reputation.

The School has close links with Watford Grammar School for Girls, and there are many opportunities for collaboration through drama, music, societies, trips abroad, joint Sixth Form activities and shared teaching for certain subjects.

Working with Younger Students

One of the benefits of this 11-18 School is the opportunity for older students to work with younger ones, through the Prefect and House Systems. We have a tradition of Sixth Formers working with younger boys in team sports and societies, and in support roles in academic work through our morning Route 1-2-1, lesson support schemes and peer mentoring. There are opportunities to work with the community outside the School as well as within it.

Form Tutors

The Sixth Form is divided into House forms. Each student is assigned a Form Tutor who takes a close interest in his academic and personal development and provides expert advice on higher education.

The Sixth Form at Watford Grammar School for Boys offers a wide choice of A Level subjects for study. It is not only academically successful but socially cohesive and offers many opportunities for students to follow their interests.

STRUCTURE OF THE A LEVEL PROGRAMME

All students will study a minimum of 3 A levels. There is also the requirement to study either a fourth A level which could be Further Mathematics or any other subject for which you gain the entry criteria, or follow a programme that leads to an Extended Project Qualification (EPQ), equivalent to an AS (or half A level), or study Core Maths (AS qualification). There is one further option for this fourth slot: students can study a MOOC (a Massive Open Online Course) which are run and certificated by the universities running the courses. Students wishing to study a **fourth full A level** must have gained **60 grades** from their best **8 GCSEs**, for example, the following results/ grades would be enough to study 4 A levels: 8, 8, 8, 8, 8, 7, 7, 6. There is no expectation that a student who has 60 or more grades should do 4 A levels as universities only require students to have 3 A levels and will make offers on this basis

There is also an enrichment programme for all Sixth Form students, comprising activities for the whole group on Friday afternoon, occasionally in association with Watford Grammar School for Girls. Additionally, all students are expected to take part in Games or a Physical Activity Session, usually on Wednesday afternoons. The remaining periods are time for students to study under their own initiative using the Sixth Form Study Centre or the Library. Students are also required to contribute to some sort of community service, either within or outside the school.

Sixth Form Study

Study in the Sixth Form is very different from that required for GCSE. Each department provides an introductory course but it is important to recognise that Sixth Formers are expected to take much greater responsibility for the management of their time, study and progress than in their previous years.

The successful study of A Level courses requires considerable commitment to homework and private study. We expect a minimum of 20 hours of study to support academic courses each week. Experience has shown that those who get into difficulty with their courses do so largely because they have failed to commit themselves to regular, weekly study and to make efficient use of their time.

Monitoring Progress

Academic progress is monitored by frequent departmental tests and assessments. The Heads of Sixth Form monitor students across their subjects and school career. After an initial 'First Check' on students' transition to Sixth Form study in October of the Lower Sixth year, reports on progress, attendance and behaviour are provided to parents electronically. It is important that any problems are discussed with the class teacher, whether they arise from a lack of understanding of key ideas or an inability to master the necessary study skills.

SIXTH FORM OPTIONS 2020

A Level subjects at present on offer appear below.

Although experience shows that most of the courses shown below will operate, the Schools cannot guarantee to run a course for which there is insufficient demand. We expect a minimum number of 12 students for a course to be viable. If numbers are low for a course in Category 1 then it might be run in collaboration with Watford Grammar School for Girls (WGSG)*. Nor can we guarantee to be able to satisfy all first choices.

Category 1

This contains subjects which will be offered at Watford Grammar School for Boys for boys only.

Ancient History	History
Art and Design	Mathematics
Biology	Philosophy and Ethics
Chemistry	Music
Computing	Physical Education
Economics	Product Design
English Language & Literature	Physics
English Literature	Politics
French	Psychology
Further Mathematics	
Geography	

Category 2

This contains subjects taught at Watford Grammar School for Girls which will be open to boys from Watford Grammar School for Boys.

Sociology

Category 3

This contains subjects which are likely to be taught in collaboration with Watford Grammar School for Girls. This could involve all lessons being taught at either school or shared teaching of these subjects.

Latin German Spanish French

***Courses run in collaboration with WGSG mean that students will need to go to the WGSG site. In most cases this will mean that students can move between the sites during study periods. In a very few cases, of which there were none this year, students will have a lesson immediately before or after a lesson at WGSG which can mean they miss some of this lesson. If this is the case then the student will be allowed to change to a different subject.**

Choice Procedure

When completing the application form you should make **THREE** or **FOUR** choices in order of preference and give **TWO** reserve choices.

Please use the following criteria when completing the application form

- All students must list at least THREE subjects and two reserve subjects.
- Students **likely** to achieve at least 60 points from their best GCSE grades **may opt** to study FOUR full A levels.
- Students wishing to study **Further Mathematics** **must** list **FOUR** subjects

Two reserve choices are needed because:

- i) We are not certain which subjects will definitely be available
- ii) At present the possible combinations of subjects are not known.
- iii) Some subjects may be oversubscribed in which case students may have to be offered an alternative.

The Sixth Form courses present an opportunity to study a balanced range of subjects, and you should seek to secure breadth and balance in your choices. Although there are a few subject areas in higher education that will demand a particular course combination, several university admissions tutors have indicated the sort of combination they will be looking for from their prospective applicants. Students are therefore advised to undertake all relevant research and to bear in mind the usefulness of their proposed combination.

Oversubscribed courses

We anticipate that in the event of a course being oversubscribed all students concerned will be asked to reconsider their choices. If after this the course remains oversubscribed, places will be allocated according to applicants' order of preference for the course as indicated on the application form. Students should therefore be aware of the importance of this choice.

You may find the following points helpful:

- Read and re-read this booklet carefully.
- Read the relevant publications or use careers/higher education software as well as consulting the UCAS and other relevant websites.
- Discuss your plans fully with your parents.
- Consult widely to see if your chosen combination of subjects is appropriate for your needs or possible career path.
- If you have a specific career in mind, or a specific University, find out the minimum entry qualifications and/or recommended subjects for any particular course.
- Consider which subjects you have found interesting at GCSE and how successful you have been.
- Talk to people with relevant expertise e.g. teachers, professionals, careers advisers.
- If you are an 'internal' applicant, take the opportunity to attend the A Level talks given by Heads of Department, 'Taster Lessons' and the Options Evening on Wednesday 5th February 2020.

Internal applications

Students applying from our present Year 11 should complete the Sixth Form Options Form. The deadline for completing the Options form will be **Monday 24th February 2020**.

External applications

Students applying from other schools should follow instructions on the School website about how to apply for a place. The A level Options evening for external applicants will be on Tuesday, October 22nd between 4:30 and 6pm. The deadline for returning the online options form will be **Friday 15th November**.

MINIMUM ENTRY REQUIREMENTS

Students wishing to enter the Sixth Form must achieve a score of 46 points from the best eight GCSEs (or equivalent) including at least a Grade 5 in both English and Maths. The point score will be determined through the addition of the numerical grades.

Students wishing to study four full A levels must have a total points score from the best 8 GCSEs (or equivalent) of 60 points.

In addition, students must achieve the following minimum requirements for each subject offered:

Ancient History	GCSE grade 6 in English Language and grade 6 in History or Classical Civilisation
Art	GCSE grade 6 in Art, Craft, Design and/or Technology
Biology	GCSE grade 7 in Biology, plus a grade 6 or better in Chemistry, or grade 7/7 in Combined Science. Plus a grade 6 or better in Mathematics and English Language or Literature
Chemistry	Either grade 7 at GCSE in Chemistry or 7/7 in Combined Science. Plus a grade 6 in both Mathematics and English Language or English Literature
Computer Science	GCSE grade 6 in Computing and grade 6 in Mathematics
Economics	GCSE grade 6 in Mathematics and grade 6 in English Language or English Literature
English Literature English Language and Literature	GCSE grade 6 in both English Language and English Literature
Film Studies	GCSE grade 6 in both English Language and English Literature
French	GCSE grade 6 in French
Geography	GCSE grade 6 in Geography and grade 5s in English, Mathematics and Science
German	GCSE grade 6 in German
History	GCSE grade 6 in History (if taken) or grade 6 in English Language or English Literature
Latin	GCSE grade 6 in Latin and grade 6 in English Language and English Literature
Mathematics	GCSE grade 7 in Mathematics. Students will also be expected to meet the minimum pass mark in a test at the start of Year 12
Further Mathematics	Both a GCSE grade 8 in Mathematics and one of the additional criteria set out in the Further Mathematics section of the prospectus. Students will also be expected to meet the minimum pass mark in a test at the start of Year 12

Music	GCSE grade 6 in Music
Philosophy and Ethics	GCSE grade 6 in English Language or English Literature
Physical Education	GCSE grade 6 in English Language or English Literature, plus grade 6 in Mathematics and grade 6/6 in Combined Science, or separate Sciences equivalent
Physics	Either grade 7 in GCSE in Physics or grade 7/7 in Combined Science. Plus a grade 6 or better in Mathematics
Politics	GCSE grade 6 in History or English Language or English Literature
Product Design	GCSE grade 6 in Product Design or GCSE grade 6 in Art/ Graphics/ Textiles
Psychology	GCSE grade 6 in Mathematics and English Language and grade 6/6 in Combined Science (or equivalents in separate Science)
Sociology	GCSE grade 5 in English Language
Spanish	GCSE grade 6 in Spanish

In addition to these subjects, students who study three full A levels are expected to choose from one of the options below:

Extended Project Qualification	Entry to WBGS Sixth Form
MOOC	Entry to WBGS Sixth Form
Core Mathematics	Entry to WBGS Sixth Form, although it is best suited to students who achieved a Grade 6 or 7 in GCSE Mathematics (or equivalent).

Important Note

Every effort has been made to make the information in this booklet as accurate as possible.

In addition, the popularity of some subjects and subject combinations may result in there being more suitably qualified applicants than there are places available. Equally, subjects with fewer than 12 students will not be viable, or only be viable if lesson time is complemented by online and personal study.

Our experience tells us that even students who exceed the minimum entry requirements may struggle with the A level courses on offer at WBGS. Students in this category will be advised clearly of the School's opinion, and be given all possible assistance in finding appropriate alternative provision.

Ancient History

Examination Board: OCR

Head of Department: E Streets

No previous study of Latin or Classical Civilisation is required.

Ancient History (H407 Option F)

The course provides an outstanding study of Greek and Roman history and culture, focusing on events, characters and ideas that changed the world. Conflict, leadership, faith and propaganda are themes running through the course. These themes offer the candidate a fresh perspective on the modern world and provide an opportunity for lively discussion on moral, ethical, social, political and cultural issues. The unique opportunities of Ancient History are well recognised by employers and universities for the skill training and multi-disciplinary approach that these topics provide and the emphasis on using all forms of evidence and challenging everything in order to find the truth.

YR 12. Greece 492-404 BC (H407/12). [25% of the A Level]

We study one of the most extraordinary periods in World History, beginning with the Persian Invasion of Greece and ending with the Peloponnesian war that would rip Greece apart. Who were the 300? Why is the battle of Salamis the most important battle in history? How did the world's largest empire fail to conquer a small collection of city states? Why would the saviours of Greek freedom and civilisation then destroy it in less than a generation?

Depth study: The Politics and Society of Sparta, c.478–404 BC. [25%]

Students will uncover the complexity of Spartan society and the interplay of social, political and military forces in this illustrious warrior community.

YR 13. The Julio-Claudian Emperors, 31 BC–AD 68 (H407/23) [25%]

We study the colourful and spectacular reigns of the first emperors of Rome: Augustus, Tiberius, Gaius, Claudius and Nero. Their rules would establish Rome as one of the greatest and most influential powers in history, as well as give us some of its most famous and elaborate characters. How did Augustus turn a Republic into an Empire? How do you rule the world? Did Nero really kill his mother, kill his wife, burn his capital city and play the fiddle? If not, why do people think he did?

Depth study: Ruling Roman Britain, AD 43–c.128 [25%]

This module examines the Roman legacy to Britain's history and the role that Britannia played in the empire. Students will examine how the Romans invaded, conquered, ruled and changed our island forever. The role of the army, Hadrian's Wall and Roman religion will be studied, as well as Celtic resistance to the newcomers.

A Sixth Form Trip to Hadrian's Wall in Northumberland is going to be run Bi-Annually for the Ancient History boys, with our first expedition to the wall next March 2020! This is an opportunity for our Classics students to get up close to the incredible remains left by the Romans and to bond as a group across the two years.

Entry requirements: No previous study of Latin or Classical Civilisation is required. A grade 6 or higher in GCSE English Language, plus grade 6 in History or Classical Civilisation is required as entry to the course.

Head of Department: G. Woods

Students will study for a GCE in Art and Design. Within this general course they will cover aspects of Fine Art including; sculpture, drawing and painting and print-making, 3D design, Textiles, Photography (including Film and Animation) and Graphic Design. They can choose to specialise in one particular discipline, such as photography and film, or alternatively, to work across a range of disciplines or materials.

The full A level consists of 3 units of work:

Introductory unit. Internally set and internally assessed.

This is a portfolio of work that demonstrates students' ability to research, develop, explore, experiment and analyse across a range of traditional and new media. It is an introductory unit of work that may or may not be incorporated into the final coursework submission. The aim of this unit is to develop students understanding, experience and confidence across an increasingly broad range of media. Media explored will include some of the following: painting and drawing, photography and film, 3D media including clay, plaster, card, wire and papier-mache. Work will be delivered in 5 week blocks and assessed at the end of each block.

Component 1 - Internally set, assessed by the teacher and externally moderated.

This component gives students opportunities to choose a project title, generate and develop ideas, research primary and contextual sources, record practical and written observations, experiment with media and processes, and refine ideas towards producing a personal resolved outcome.

This component incorporates three major elements: supporting studies, practical work, and a personal study.

- Supporting studies and practical work is made up of a portfolio of development work and outcomes based on themes and ideas developed from personal starting points.
- The personal study will be a critical written communication showing contextual research and understanding in a minimum 1000 words of continuous prose, which may contain integrated images. (60% of the final grade).

Component 2 - Externally set, this is assessed by the teacher and externally moderated.

This component allows students opportunities to generate and develop ideas, research primary and contextual sources, record practical and written observations, experiment with media and processes, and refine ideas towards producing personal resolved outcome(s) in response to an externally set theme.

This component incorporates two major elements: preparatory studies and the 15-hour period of sustained focus.

- Preparatory studies will comprise a portfolio of practical and written development work based on the Externally Set Assignment.
- During the 15-hour period of sustained focus under examination conditions, students will produce final outcome(s) extending from their preparatory studies in response to the Externally Set Assignment.

Entry requirements: Grade 6 or above in a relevant Art and Design and/or Design Technology course. Students without any previous qualifications may also be considered and should apply directly to the Head of Department with a portfolio of work that clearly demonstrates ability and interest in their chosen option.

Head of Department: G.W. Rowe

Biology is an interesting, relevant and conceptually demanding choice at A-Level. The relevance of Biology to new technologies and healthcare is constantly growing and an understanding of scientific issues is increasingly important to interpret the world around us. The subject links in particularly well with A Level courses in the other sciences, maths and psychology as well as providing excellent preparation for Medicine and biological degree courses. The course builds upon knowledge gained at GCSE and looks to examine particular principles in more detail. There is a broad range of topic areas over the two years, such as genetic engineering, the immune response, the production of antibiotics and the mechanisms that allow plants to transport water. We regularly have students going to university reading Medicine, Dentistry, Biomedical Science and Genetics and have students taking A Level Biology progressing to study at Oxbridge universities.

The AQA specification provides excellent progression from the GCSE course taken at WBGS and also by the majority of other local schools. Practicals will be completed across the two years and assessment of these will be included in the written exams. In addition, practical work is logged such that the Practical Endorsement may be awarded to those students that fulfil the criteria. The Endorsement is awarded independently of the A Level grade that a candidate attains. The department has a supportive culture and put in place additional sessions to ensure everyone has every opportunity to succeed in the final exams and the practical endorsement. Within the School, Biology also take a lead in using new technologies to facilitate learning adding to the experience of studying within the department.

Paper 1

35% of the total qualification

- Topic 1 Biological molecules
- Topic 2 Cells
- Topic 3 Organisms exchange substances with their environment
- Topic 4 Genetic information, variation and relationships between organisms

Paper 2

35% of the total qualification

- 5 Energy transfers in and between organisms (A-level only)
- 6 Organisms respond to changes in their internal and external environments (A-level only)
- 7 Genetics, populations, evolution and ecosystems (A-level only)
- 8 The control of gene expression (A-level only)

Paper 3

30% of total qualification

This synoptic paper will include questions from Topics 1–8 and includes

Entry requirements: A grade 7 or better in Biology with a minimum of grade 6 in Chemistry, or for those with Combined Science GCSE grade 7/7 is required. Applicants must also have grade 6 or above in English Language or English Literature and Mathematics.

Chemistry

Examination Board: WJEC / Eduqas

Head of Department: C.G.D. Sykesud

Chemistry presents a challenging, stimulating A Level. The course aims to foster imaginative and critical thinking, to develop ideas and to build upon the processes and skills learnt at GCSE level. Models presented in Key Stages 3 and 4 are re-visited. They are re-evaluated and modified in the light of the more profound and sophisticated evidence and information that become available at this advanced intellectual level.

As a practical subject, much of the work is centred on learning through laboratory experience. The Chemistry A Level incorporates a number of themes that include structure and bonding, reaction rates and equilibria, the mole, energy and practical assessment. It builds upon the GCSE by including a wider range of elements and compounds, with a more extensive study of organic chemistry.

It is important that candidates be able to express themselves clearly in unambiguous English, whilst many aspects of Chemistry also require a good level of numeracy.

Sets are shared between two specialist A Level Chemistry teachers in each of the sixth form years. In addition, practical work is logged such that the Practical Endorsement may be awarded to those students who fulfil the criteria. The Endorsement is awarded independently of the A Level grade that a candidate attains.

Qualification Accreditation Number: 601/5645/4

Core Ideas, Principles and Concepts

Topic C1 The language of chemistry and structure of matter

Topic C2 Chemical change

Topic C3 Chemistry of carbon compounds

Physical and Inorganic Chemistry

Topic P11 Electrochemistry

Topic P12 More complex patterns of the Periodic Table

Topic P13 Chemical kinetics

Topic P14 Energy changes

Topic P15 Equilibria

Organic Chemistry and Analysis

Topic OA1 Higher concepts in organic chemistry

Topic OA2 Organic compounds containing oxygen

Topic OA3 Organic compounds containing nitrogen

Topic OA4 Organic synthesis and analysis

The examinations, taken at the end of the upper sixth, are:

Component 1: Physical and Inorganic Chemistry, 2 ½ hours, 40% of the qualification

Component 2: Organic Chemistry and Analysis, 2 ½ hours, 40% of the qualification

Component 3: Chemistry in Practice, 1 ¼ hours, 20% of the qualification

Entry requirements: either grade 7 at GCSE in Chemistry or grade 7/7 in Combined Science GCSE, plus a minimum of grade 6 in Mathematics. A grade 6 in either English Language or English Literature is also required.

Head of Department: N. Adcock

Computer Science has been a fundamental building block of the society we live in today. From helping to crack encrypted codes through to the Internet and mobile phones it has already contributed much. However, many great challenges lie in the future for Computer Scientists to solve. This course, with its emphasis on general problem-solving, programming and a fundamental understanding of how computers work is an excellent foundation for helping to solve these future challenges. The course is split into practical and theoretical work. The practical elements all revolve around learning how to programme (in Python), which is basically solving endless logical puzzles. The theory deals with such topics as number systems and how a processor works.

Component 01 - COMPUTER SYSTEMS

- This component is a traditionally marked and structured question paper with a mix of question types:
- The characteristics of contemporary processors, input, output and storage devices
- Software and software development
- Exchanging data
- Data types, data structures and algorithms
- Legal, moral, cultural and ethical issues.

Component 02 - ALGORITHMS AND PROGRAMMING

- Traditional questions concerning computational thinking:
- Elements of computational thinking
- Programming and problem solving
- Pattern recognition, abstraction and decomposition
- Algorithm design and efficiency
- Standard algorithms
- There will be a scenario/task contained in the paper, which could be an algorithm or a text page-based task, which will involve problem solving.

Component 03 - PROGRAMMING PROJECT

- Students select their own user-driven problem of an appropriate size and complexity to solve. Students analyse the problem, design a solution, implement the solution and give a thorough evaluation.

More information

<http://www.ocr.org.uk/qualifications/as-a-level-gce-computer-science-h046-h446-from-2015/>

Entry requirements: Grade 6 in Computing GCSE and grade 6 in Mathematics.

Head of Department: A Reid

The study of Economics enables students to understand how the material resources of an individual, a community, a country or the world are managed. It is an ideal subject for students who are beginning to become interested in current affairs and who want to develop an informed and critical knowledge of how the world works. It is welcomed by universities as a rigorous and academic qualification. The subject works particularly well with Mathematics, which is a prerequisite for a degree in Economics at most universities. It also complements subjects such as Politics, History, Psychology and Geography.

Taking an enquiring, critical and thoughtful approach to the subject, students of our AQA A level in Economics will develop the ability to think like an economist, and to appreciate the contribution of economics to an understanding of the wider economic and social environment.

Qualification at a glance

The AQA Level 3 Advanced GCE in Economics is structured into two areas, micro economics and macro economics and consists of three externally examined papers. Students build knowledge and understanding of core economic models and concepts in Year One, and then build on this and apply their knowledge to more complex concepts and models in Year Two. Students will need to apply their knowledge and understanding to both familiar and unfamiliar contexts in the assessments and demonstrate an awareness of current economic events and policies.

Year 1: **The Operations of Markets and Market Failure**

This theme focuses on microeconomic concepts..

Students will develop an understanding of:

- nature of economics**
- how markets work**
- government intervention**

Year 1: **National Economy in a Global Economy**

This theme focuses on macroeconomic concepts.

Students will develop an understanding of:

- measures of economic performance**
 - aggregate demand**
 - aggregate supply**
 - national income**
 - economic growth**
- macroeconomic objectives and policy**

Year 2: **Individuals, Firms, Markets and Market Failure**

This theme develops the microeconomic concepts introduced in Year 1 and focuses on business economics.

Students will develop an understanding of:

- business objectives**
- revenues, costs and profits**
- market structures**
- labour market**
- government intervention**

Year 2: **The National and International Economy**

This theme develops the macroeconomic concepts introduced in Year 1 and applies these concepts in a global context.

- international economics**
- poverty and inequality**
- emerging and developing economies**
- the financial sector**
- role of the state in the macro economy**

Entry requirements: A minimum of grade 6 in GCSE Mathematics and a grade 6 in GCSE English Language or English Literature.

English Literature

Examination Board: OCR

Head of Department: J Callow

English Literature A level aims to develop skills of literary analysis through creative engagement with a range of prose, poetry and drama texts. You will gain a deeper understanding of the heritage and changing traditions of literature in English as well as exploring multiple modes of reading, from artistic to political.

You will study diverse texts ranging from work first published and performed since 1300 to post-1990, including one play by Shakespeare. There is a strong focus on critical literary skills, contexts and interpretations by other 'readers'.

English lessons at A-level are structured around discussion. Lessons are student-centred, encouraging participation from all. The courses also place immense value on the importance of creative response. In addition, English A levels also provide access to a range of extra-curricular opportunities, from editing *The Fullorian* magazine to attending residential creative writing courses and overseas trips.

English Literature A level offers you the chance to develop key skills of communication and analysis which are highly valued by universities and employers alike. You will also develop a wider cultural understanding.

Summary of units:

Component 1: Students study one Shakespeare, one Drama and one poetry pre-1900 text (40%)

Component 2: Close reading of a passage in chosen topic area. Comparative and contextual study from chosen topic area (40%)

Coursework: Literature post 1900. Learners are required to study three literary texts for this unit. The three texts must include one prose text, one poetry text and one drama text. Students perform a close reading of a passage or produce re-creative writing piece with commentary. In addition, students write a comparative essay on two linked texts (20%)

Entry requirements: Grade 6 in GCSE English Language and grade 6 in English Literature.

As the department offers two English A level options, if you wish to take English Literature, you should make this very clear on your Options Form.

Acting Head of Department: J Callow

English Language and Literature aims to deepen your understanding of the use of language and develop skills of literary and linguistic analysis through creative engagement with a range of texts. You will study a stimulating range of texts from the classics to contemporary fiction.

English lessons at A-level are structured around discussion. Lessons are student-centred, encouraging participation from all. The courses also place immense value on the importance of creative response. In addition, English A levels also provide access to a range of extra-curricular opportunities, from editing *The Fullerian* magazine to attending residential creative writing courses and overseas trips.

English Language and Literature A level offer you the chance to develop key skills of communication and analysis which are highly valued by universities and employers alike. You can also learn about new topics such as how speech gives away your background and you can practise being a creator, producer and critic of texts yourself.

Summary of units:

Component 1: Exploring non-fiction and spoken texts

Focuses on an OCR (EMC) anthology of 20 non-fiction spoken and written texts across different time periods and contexts. Comparative and contextual study based on the anthology and unseen texts. (16%)

Component 2: The language of poetry and plays

Focuses on one poetry collection from a choice of six and one drama text from a choice of six. Exploration of the texts through stylistic and dramatic analysis. (32%)

Component 3: Reading as a writer, writing as a reader

Focuses on exploring the nature of narrative in one prose fiction text from a choice of six. Writing as a reader develops the understanding of narrative technique through a creative task and a commentary. (32%)

Coursework Independent study: analysing and producing texts.

Independent study allowing learners to pursue particular interests and develop their expertise through an analytical comparative essay on a set text from a list of 12 non-fiction texts and a second free choice text. One text must be post-2000. Learners must also produce a piece of original non-fiction writing. (20%)

Entry requirements: The entry requirement for both English A levels is grade 6 in GCSE English Language and grade 6 in English Literature.

As the department offers two English A level options, if you wish to take English Language and Literature, you should make this very clear on your Options Form.

The course ignites your passion for film as we explore and engage critically with a wide range of film from different cultures, eras and genres to develop confident responses. You will demonstrate understanding through either filmmaking or screenwriting.

Aims and outcomes:

- demonstrate knowledge and understanding of a diverse range of film, including documentary, film from the Silent Era, experimental and short film
- understanding of film and its key contexts (including social, cultural, political, historical and technological contexts)
- knowledge and understanding of how films generate meanings and responses
- understanding of the different ways in which spectators respond to film
- apply critical approaches to film
- apply knowledge and understanding of film through either filmmaking or screenwriting

Content Overview	Assessment Overview	
<p>Learners will develop knowledge of film form through the study of at least three US set films from:</p> <ul style="list-style-type: none"> • the Silent Era • 1930–1960 • 1961–1990. <p>Learners will also study set films from two major European film movements or stylistic developments:</p> <ul style="list-style-type: none"> • Experimental film (European surrealist film) and <i>either</i> • German expressionism <i>or</i> • French new wave. 	<p>Film History (01) 105 marks 2 hour paper</p>	<p>35% of total A Level</p>
<p>Learners will further develop knowledge and understanding of key critical approaches to film and of narrative, genre, representations and spectatorship.</p> <p>Learners must study at least one set film from each of the categories below:</p> <ul style="list-style-type: none"> • Contemporary British • Contemporary US • Documentary • Non-European non-English language • English language (non-US) • US Independent. 	<p>Critical Approaches to Film (02)* 105 marks 2 hour paper</p>	<p>35% of total A Level</p>
<p>Learners must study one compilation of short British fiction films. Learners have the opportunity to demonstrate knowledge, understanding and skills through:</p> <ul style="list-style-type: none"> • the production of a 5 minute short film or a 10 minute screenplay for a short film (incorporating a digitally photographed storyboard) • an evaluative analysis of the production in relation to professionally produced set short films. 	<p>Making Short Film (03/04)* 90 marks Non-examined assessment (NEA)</p>	<p>30% of total A Level</p>

The full course specification is available online:

<https://www.ocr.org.uk/Images/316666-specification-accredited-a-level-gce-film-studies-h410.pdf>

Entry Requirements- A grade 6 minimum in English Language and English Literature GCSE

Head of Department: N. Twyford

During the course, you will improve your fluency in the language by listening to, discussing and reading authentic, contemporary French. Students have individual speaking lessons with the French Assistant on a weekly basis.

A-Level: Code 7652

The A-Level course will cover:

- **Aspects of French-speaking society:** current trends, current issues
- **Artistic culture in the French-speaking world**
- **Aspects of political life in the French-speaking world**
- **Grammar**
- **Literature and Film**

The A-Level specification has 3 units:

Unit	Outline	Weighting
Paper 1	<p>Listening, Reading and Writing Candidates will answer a range of questions based on approximately 5 minutes of heard material and on a selection of written stimulus texts. All questions are in French, to be answered with non-verbal responses or in French.</p> <p>Translation into English (a minimum 100 word passage) Translation into French (a minimum 100 word passage)</p>	50%
Paper 2	<p>Writing and Grammar Candidates will write 2 300 word essays from a choice of 2 set texts, or 1 set text and 1 film (that will have been studied during the 2 years)</p>	20%
Paper 3	<p>Speaking Candidates will have completed an individual research project that they must then discuss. Candidates must be prepared to discuss one of the 4 sub-themes (current trends, current issues, artistic culture or political life)</p>	30%

Entry requirements: The minimum requirement is grade 6 (grade 7 preferred) at GCSE level. A sound knowledge of French grammar is essential.

Geography

Examination Board: AQA

Head of Department: A. Edmonds

Specification: AQA Geography A-Level (7037)

The study of Geography concerns not only the nature of the physical world but also the complex relationships between society and the environment and makes a valuable and unique contribution to the understanding of some of the most important contemporary global issues. At A-level you will explore a range of geographical concepts; some brand new ideas and some topics will build on existing GCSE learning. You will study a balance of physical and human geography as well as build on your understanding of geographical skills.

Physical geography:

- ✓ Section A: Water and carbon cycles
- ✓ Section B: Coastal systems & their landscapes
- ✓ Section C: Hazards

Human geography:

- ✓ Section A: Global systems and global governance
- ✓ Section B: Changing places
- ✓ Section C: Contemporary Urban Environments

What are the opportunities for learning outside the classroom?

As part of your A-level course, you will take part in a minimum of 4 days field work, including a residential trip. Current field work locations include: Wales, London, Surrey and Somerset.

How will you be assessed?

Examinations (80%): All exam assessment will take place at the end of Year 13 as this course is linear.

Title of exam	% of A-Level	Length	Total marks	Question style
Physical geography	40	2 hours 30 minutes	120	Multiple-choice, short answer, levels of response and extended prose
Human geography	40	2 hours 30 minutes	120	Multiple-choice, short answer, levels of response and extended prose

Geographical investigation (20%): You will complete an individual geographical investigation in the field and produce a written report of up to 4000 words. You will get some choice as to what part of the specification you base your report on. This report will be marked out of 60 by your teachers and then moderated by AQA.

Entry requirements: The minimum required grade is a 6 in GCSE Geography, although a grade 7 is preferred. Grade 5 in English, Mathematics and Science GCSE courses are also required, again higher is preferred. Anyone wishing to take the subject who has not studied it at GCSE but who meets the further criteria and shows interest and commitment will be considered.

German

Examination Board: AQA

Head of Department: N. Twyford

During the course, you will improve your fluency in the language by listening to, discussing and reading authentic, contemporary German. Students have individual speaking lessons with the German Assistant on a weekly basis. There is also the opportunity for all students to undertake a week of work experience on the German Exchange.

A-Level: Code 7662

The A-Level course will cover:

- **Aspects of German-speaking society**
- **Artistic culture in the German-speaking world**
- **Multiculturalism in German-speaking society**
- **Aspects of political life in German-speaking society**
- **Grammar**
- **Literature and Film**

The A-Level specification has 3 units:

Unit	Outline	Weighting
Paper 1	Listening, Reading and Writing Candidates will answer a range of questions based on approximately 5 minutes of heard material and on a selection of written stimulus texts. All questions are in German, to be answered with non-verbal responses or in German. Translation into English (a minimum 100 word passage) Translation into German (a minimum 100 word passage)	50%
Paper 2	Writing and Grammar Candidates will write 2 300 word essays from a choice of 2 set texts, or 1 set text and 1 film (that will have been studied during the 2 years)	20%
Paper 3	Speaking Candidates will have completed an individual research project that they must then discuss. Candidates must be prepared to discuss one of the 4 sub-themes (aspects, multiculturalism, artistic culture or political life)	30%

Entry requirements: The minimum requirement is grade 6 (grade 7 preferred) at GCSE level. A sound knowledge of German grammar is essential.

Head of Department: J. McDermott

The overall aim of this course is to offer you a wide-ranging option that takes you into new periods and places in history from the ones you have studied at GCSE level. Students taking this exciting new course will study the recent histories of the USSR and Mao's China in great depth, by looking at their relative positions before, during and after the major events of the early twentieth century. Karl Marx's two texts *Das Kapital* and *The Communist Manifesto* have done more to transform the ideological landscape of the world arguably than any other texts and have been adapted to suit the circumstances of each differing country through the dictatorships of Lenin and Mao. In the words of S.A. Smith:

'The Russian Revolution of 1917 saw the overthrow of the tsarist autocracy in February and the seizure of power by the Bolshevik party in October...Their revolution proved to be the most consequential event of the 20th century, inspiring communist movements and revolutions across the world, notably in China, provoking reaction in the form of fascism, and after 1945 having a profound influence on many anti-colonial movements and shaping the architecture of international relations through the Cold War.' (S.A. Smith)

In the Lower Sixth, you will get the opportunity to study different communist countries across the twentieth century. Industrialised Russia had two revolutions in 1917 which transformed it from a backward looking empire to a superpower in 30 years. Under the unwavering leadership of Lenin to the brutal dictatorship of Stalin the country suffered purges, famine and survived the ultimate test in WWII from a besieging Nazi invasion. Khrushchev and Brezhnev had to position the USSR in the Cold War so that Communism survived and prospered until its final decline under Gorbachev and Yeltsin. These 74 fascinating years have impacted on world history in a variety of ways and continue to echo into the present under Putin's presidency.

As a contrast, you will study in depth how Mao transformed a largely rural Imperial China towards a communist dictatorship with the focus on the Cult of Mao himself who in the Cultural Revolution and purges devastated families and communities in the name of the ideological struggle for Communism. China's importance on the world economy over the last 40 years is a direct result of the economic foundations laid by Mao and the autocratic nature of the regime he ruled over for so long. The traditional past of China transformed in an effort to modernise and the history of that development offers a great contrast to our society's history over the same period.

In the Upper Sixth you will focus on a pivotal period of British imperial before the First World War, where Britain "ruled the waves" and Queen Victoria presided over one of the world's great Empires. Alongside your study of 19th century British History you will learn about one of Britain's lasting problems – the struggle for independence in the "Jewel in the Crown", especially in India, from the first Great Rebellion in India in 1857 to independence for India and its partition into India and Pakistan in 1947.

The course offers the opportunity to develop a range of skills including analysis, interpretation and the coherent presentation of findings. These will be tested in shorter and longer essay questions with some focus on sources and a significant coursework at A2. Areas of study have been chosen to provide interest and breadth to students in the Sixth Form. Teaching uses a range of sources to encourage discussion and the development of examination technique. History is a very popular option at this level and offers students a wide range of university and career options.

Route E: Communism in the 20 th Century	Paper
<p><u>Paper 1: Russia 1917-91: from Lenin to Yeltzin</u> This option comprises a study in breadth, in which students will learn about the key political, social and economic features of communist rule in Russia during the twentieth century, an era that saw the USSR's authority and influence rise to the status of a superpower, only to diminish and decline later in the century:</p> <ul style="list-style-type: none"> ● Establishing Communist Party control under Lenin, 1917–24: ● Stalin in power, 1928–53: The secret police, purges and WWII ● Reform, stability and stagnation, 1953–85 ● Industry and agriculture in the Stalin era: the Five-Year Plans ● State control of mass media, propaganda and religion 	30% A-level (Essays and historical interpretations)
<p><u>Paper 2: Mao's China 1949-76:</u> Investigates in depth the impact of Mao's reorganisation of China with emphasis on Communist ideology and the part it played in political, economic, social and foreign policy.</p> <ul style="list-style-type: none"> ● China before the Revolution in 1949 ● Takeover and consolidation of power by Mao ● Rebuilding of China: Agriculture, Industry, Five Year Plans ● Great Leap Forward: Causes, Effects and Impact ● Terror and Control ● Cultural Revolution ● Foreign Policy: Cold War conflicts – Korea, Vietnam and ping pong diplomacy 	20% of A-level (Interpretations and source essays)
<p><u>Paper 3: Britain: Losing and Gaining an Empire 1763 -1914:</u> This option offers boys the opportunity to study Britain's influence on the development of the world during an exciting period of History. It offers a broad overview from the mid-18th century to the outbreak of the First World War. Key events that have shaped our modern world politics will be studied such as the American War of Independence, complemented by individuals such as Gordon of Khartoum. The focus moves away from Europe to considering countries not touched at GCSE such as Australia, India and Africa. This is an exciting opportunity for boys to discover how Britain came to rule one quarter of the world's land surface changing politics, society and the global economy for ever.</p> <ul style="list-style-type: none"> ● The Origins of British Power ● The Indian Mutiny and Its Impact ● The British Raj 1858-1914 ● The Nature of Colonial Society ● The Role of the Indian Army ● The Great Game: The Northwest Frontier and Rivalry with Russia 	
<p><u>Paper 4: Coursework India and the British Empire 1757-1947</u> This is an essay assignment that considers a range of interpretations over distinct issues in Indian history within the British Empire up to independence in 1947. Students will devise a question and tackle it using a range of accessible source and reference material before reaching an evaluated conclusion. This follows on from Paper 3 learning and can include:</p> <p>The Rise of Indian Nationalism</p> <ul style="list-style-type: none"> ● The Amritsar Massacre of 1919 and its Impact ● Gandhi's Campaigns for Civil Rights and Independence and their Impacts <p>British Politics and India 1919-39</p> <p>India and the Second World War</p> <ul style="list-style-type: none"> ● The Fall of Singapore and Its Impact on the Image of Imperial Superiority (Pax Britannica?) <p>The End of the Empire</p> <ul style="list-style-type: none"> ● Economic Pressures on Post-War Britain and their Impact on Imperial Policy ● Attlee's Labour government and Britain's decision to withdraw ● The Role of Key Personalities in the rise of Muslim and Indian Nationalism <p>The Outbreak and Impact of Communal Violence 1947</p>	

Entry requirements: At least a grade 6 in GCSE History (or English Language or Literature for those who have not taken the subject at GCSE).

Head of Department: E. Streets

Latin creates intellectual, analytical, curious and well-rounded students, who are greatly sort after by Universities. A wealth of careers can be improved by both the knowledge and skills developed in this subject. It is a subject that brings the Science and Humanity Worlds together; uniting Linguists with Mathematicians, Scientists with Historians, and providing the perfect platform for all-rounders.

The Latin language is studied to develop accuracy in translation and command of idiom and style. It requires dedication and pin-point accuracy- it's a challenge, but an enjoyable one!

Latin texts (prose and verse) are studied in depth to develop critical understanding. How does Cicero try to influence his audience? Is the characterisation of the poet as a suffering lover true to heart or just made up? At A Level, we have an opportunity to read and understand Ancient Literature in a way that can never be provided by a translation.

This subject is taught in conjunction with the Girls' School, so our boys get an opportunity to experience a new environment and be stretched by the ambitious and conscientious girls. Our boys are always up to the challenge!

There are exam papers in:

- Prose and verse unseen translation
- Prose composition or comprehension
- Prose literature (two authors - Cicero (our choice)/ Tacitus for 2018)
- Verse literature (two authors – Virgil/ elegiac poets eg Ovid (our choice) for 2018)

The marks for language and literature are divided 50-50. It is therefore important that candidates embrace literature and its appreciation as much as they enjoy taking on the challenge of vocabulary and analysing grammatical structure!

Entry requirements: Grade 6 in Latin and grade 6 in English Language and English Literature.

Head of Department: P. Matthews

This two year course builds directly on the foundation of the GCSE Higher Level syllabus. It presupposes skills in basic algebraic manipulation and the ability to work logically through multi-stage problems. Students are encouraged to think, reason and communicate mathematically, providing them with the skills to analyse situations in mathematics and elsewhere. The mathematical knowledge gained will be broad and widely applicable, preparing students for a range of destinations in Higher Education and employment.

The A-Level specification has 3 components:

Component	Outline Content	Weighting
1	Core Pure Mathematics 1 (2 hour paper) Indices and surds, polynomials, coordinate geometry, trigonometry, sequences and series, algebra and functions, differentiation and integration, numerical methods, exponentials and logarithms, proof, vectors	$33\frac{1}{3}\%$
2	Core Pure Mathematics 2 (2 hour paper) Any pure maths content as above	$33\frac{1}{3}\%$
3	Statistics and Mechanics (2 hour paper) Sampling, interpretation in context, standard deviation, binomial and normal distributions, hypothesis testing, use of large data sets, conditional probability. (50% of paper) Newton's laws of motion, kinematics of motion in a straight line and under gravity, equilibrium of a particle, force as a vector and resolving forces, projectile motion, moments (50% of paper)	$33\frac{1}{3}\%$

Entry requirements: Grade 7 at GCSE Mathematics or its equivalent. Students will additionally be expected to meet the minimum pass mark in a test at the beginning of Year 12.

Head of Department: S. M. Hussey

A LEVEL MUSIC (9MU0)

Component 1: Performing (30% of the qualification)

This component gives students the opportunity to perform either as soloists or as part of an ensemble, developing skills in instrumental lessons and through attendance at the variety of ensembles on offer in School. For the assessment, any instrument or voice is acceptable, the music can be in any style, it can also be improvised, but students need to perform for a minimum of 8 minutes. The expected difficulty of pieces offered is taken to correspond to Grade 7 of the graded examinations of such bodies as the Associated Board, Trinity, Rockschoo and the London College of Music. When students perform at a level that exceeds Grade 7, additional credit will be awarded. Equally, students selecting pieces of music that are Grades 1–6, will restrict their opportunity to access the higher levels and marks in the assessment grids for their performance. The performance needs to be completed between March and May in the examination year.

Component 2: Composing (30% of the qualification)

This component encourages students to develop their skills in composing, leading to the creation of two pieces of music lasting for a minimum of six minutes in total. One piece must either be related to a brief given by the examination board or be a free composition. The briefs will be set within various types of music including jazz and popular music, music for film, music for voice and fusions, but the free composition is totally in the hands of the student composer. The other piece must be chosen from a list of briefs which assess skills in compositional techniques, and these will include writing a Bach chorale, writing two-part counterpoint, making an arrangement and creating a remix. All of the briefs are released in September of the exam year.

Component 3: Appraising (40% of the qualification)

This component is based around Edexcel’s New Anthology of Music. Students study set works from the Anthology and answer questions on these in the final examination. There are three shorter questions and one longer essay question relating to the set works. Students also need to write an essay that relates the set works to other similar, but unfamiliar music. The works to be studied and their categories are detailed below:

VOCAL MUSIC	<ul style="list-style-type: none"> ● J. S. Bach, Cantata, Ein feste Burg, BWV 80: Movements 1, 2, 8 ● Mozart, The Magic Flute: Excerpts from Act I no. 4 (Queen of the Night), 5 (Quintet) ● Vaughan Williams, On Wenlock Edge: Nos. 1, 3 and 5 (‘On Wenlock Edge’, ‘Is my team ploughing?’ and ‘Bredon Hill’)
INSTRUMENTAL MUSIC	<ul style="list-style-type: none"> ● Vivaldi, Concerto in D minor, Op. 3 No. 11 ● C. Schumann, Piano Trio in G minor: Movement 1 ● Berlioz, Symphonie Fantastique: Movement I
MUSIC FOR FILM	<ul style="list-style-type: none"> ● Bernard Herrmann, Psycho: Prelude, The City, Marion, The Murder (Shower Scene), The Toys, The Cellar, Discovery, Finale ● Rachel Portman, The Duchess: Mistake of Your Life, Six Years Later, Never See your Children again, The Duchess (End titles). ● Danny Elfman, Batman Returns: Main theme (Birth of a Penguin Part II), Birth of a Penguin Part I, Rise and fall from grace, Batman vs the Circus
POPULAR MUSIC AND JAZZ	<ul style="list-style-type: none"> ● Beatles – Revolver: Eleanor Rigby, Here, there and everywhere, I want to tell you, Tomorrow never knows ● Courtney Pine – Back in the Day: Inner state (of mind), Lady Day and (John Coltrane), Love and affection ● Kate Bush: Hounds of Love: Cloudbursting, And Dream of Sheep, Under Ice

FUSIONS	<ul style="list-style-type: none"> ● Debussy, 'Estampes': Nos. 1 and 2 ('Pagodes' and 'La soirée dans Grenade') ● Anoushka Shankar: Breathing Under Water: Burn, Breathing Under Water and Easy. ● Familia Valera Miranda: Cana Quema: Se quema la chumbamba, Alla va candela.
NEW DIRECTIONS	<ul style="list-style-type: none"> ● Cage – Three Dances for two prepared pianos: No. 1 ● Saariaho: Petals for Cello Solo and Live Electronics ● Stravinsky: Le sacre du printemps: Introduction, Les augures printaniers, Jeu du rapt.

Entry requirements: Minimum of grade 6 in GCSE Music.

Head of Department: T. Charlton

The course will challenge students intellectually as well as personally. It is very much an academic course which may shatter many pre-conceptions. Lively discussions and debate often occur. Students who did not study PRE at GCSE are very welcome.

What do you study?

Philosophy

- ancient philosophical influences
- arguments about the existence or non-existence of God
- the nature and impact of religious experience
- the challenge for religious belief of the problem of evil
- the nature of the soul, mind and body
- the possibility of life after death
- ideas about the nature of God
- issues in religious language.

Ethics

- normative ethical theories
- the application of ethical theory to two contemporary issues of importance
- ethical language and thought:
- debates surrounding the significant ideas of conscience and free will
- the influence on ethical thought of developments in religious beliefs and the philosophy of religion.

Development in Christian thought

- religious beliefs, values and teachings, their interconnections and how they vary historically and in the contemporary world
- sources of religious wisdom and authority
- practices which shape and express religious identity, and how these vary within a tradition
- significant social and historical developments in theology and religious thought
- key themes related to the relationship between religion and society.

Entry requirements: Grade 6 in GCSE English Language or Literature plus a grade 6 in one other humanity subject (grade 7 preferred). The course requires a keen interest in studying the theories of scholars (philosophers and theologians) which will often involve handling academic text which can be quite challenging. PRE GCSE is not required.

Head of Department: J. Dyson

Aims

Content Overview		Assessment Overview
<ul style="list-style-type: none"> Applied anatomy and Physiology Exercise physiology Biomechanics 	Physiological factors affecting performance (01)* 90 marks 2 hour written paper	30% of total A level
<ul style="list-style-type: none"> Skill acquisition Sports psychology 	Psychological factors affecting performance (02)* 60 marks 1 hour written paper	20% Of total A level
<ul style="list-style-type: none"> Sport and society Contemporary issues in physical activity and sport 	Socio-cultural issues in physical activity and sport (03)* 60 marks 1 hour written paper	20% of total A level
<ul style="list-style-type: none"> Performance or Coaching Evaluation and Analysis of Performance for Improvement (EAPI) 	Performance in physical education (04)* 60 marks** Non-exam assessment (NEA)	30% of total A level

To provide opportunities to develop the student's physical potential and achievements.

To provide the student with a thorough understanding of a person's movement, performance and behaviour through both theoretical and practical means.

Entry requirements: It must be noted that the A level is split into theory and practical. All students must achieve grade 6 in both Science and Additional Science and grade 6 in English Language or Literature and in Maths. Candidates who have participated in PE GCSE will have their theory grade taken into consideration and it will be expected that a grade 6 has been achieved within this element of the GCSE. It is not a requirement to have done GCSE PE.

Physics

Examination Board: WJEC (Eduqas)

Head of Department: J. Hensman

A Level Physics provides excellent opportunities for the study of science beyond GCSE. The course carefully builds on GCSE knowledge, covering the fundamental topics early on to give a firm basis for later study as well as developing useful and more sophisticated practical skills. Students are encouraged to understand the processes of Physics and the way the subject develops through experiment, theory, insight and creative thought. The dependence of Physics on good mathematical analysis is constantly emphasised and the ability to communicate ideas clearly and concisely is also essential.

Physics is conceptually challenging and should appeal to students with a curiosity about the world and its place in the Universe. The course is made up of three components (or units), each of which is assessed via written exam at the end of two years of study. Experimental physics and practical competency are assessed via the non-exam 'practical endorsement' which is carried via a series of compulsory experiments and other practical activities.

Component 1 Newtonian Physics (31.25% of the A level)

This component covers the following areas of study:

Basic physics, kinematics, dynamics, energy concepts, circular motion, vibrations, kinetic theory and thermal physics.

Component 2 Electricity and the Universe (31.25% of the A level)

This component covers the following areas of study:

Conduction of electricity, resistance, D.C. circuits, capacitance, solids under stress, electrostatic and gravitational fields of force, using radiation to investigate stars, orbits and the wider universe.

Component 3 (37.5% of the A level)

This component covers the following areas of study:

1. The nature of waves, wave properties, refraction of light, photons, Lasers, nuclear decay, particles and nuclear structure, nuclear energy, magnetic fields, electromagnetic induction, plus:

Choice of 1 option from 4:

A: Alternating currents

B: Medical physics

C: The physics of sports

D: Energy and the environment

The Practical Endorsement

The assessment of practical skills is a compulsory requirement of the course of study for A level qualifications in Physics. It will appear on all learners' certificates as a separately reported result, alongside the overall grade for the qualification. (The arrangements for the assessment of practical skills will be common to all awarding organisations.)

Entry requirements: Either Grade 7 in Physics or grade 7/7 in Combined Science plus a minimum of grade 6 in Mathematics.

Politics A level

Examination Board: AQA

Teacher in charge: S. Riaz

Paper 1		Paper 2		Paper 3
Government and Politics of the UK		Government and Politics of the USA and Comparative Politics		Political Ideas
Constitution Parliament Prime Minister The judiciary Devolution	Democracy Elections Parties Pressure groups The EU	Constitution Congress President Supreme Court	Elections Parties Pressure groups Civil rights	Liberalism Conservatism Socialism Nationalism
How it's assessed: Written exam: 2 hours 77 marks 33⅓ % of A-level		How it's assessed: Written exam: 2 hours 77 marks 33⅓ % of A-level		How it's assessed: Written exam: 2 hours 77 marks 33⅓ % of A-level
Questions: A mixture of medium length 'explain' and essay style questions		Questions: A mixture of medium length 'explain' and essay style questions		Questions: A mixture of medium length 'explain' and essay style questions

From Trump to Brexit the political landscape is constantly changing and it has arguably never been more important to be politically well informed.

In the Lower Sixth the students will cover all of Paper 1 but will also study some aspects of Paper 2 and Paper 3 so that this content is familiar by year 13. The content of Paper 1 includes all aspects of British politics from the institutions of Parliament and the executive to the nature of political parties and elections as well as referendums.

Students are not assumed to have any prior knowledge of Politics but should take a keen interest in current affairs. Students will have the opportunity to visit the Palace of Westminster and the Supreme Court in year 12.

In year 13 students build on their knowledge of the British political system by focussing on a comparative study: the government and politics of the USA. As well as being a colossus in world affairs the US forms a great contrast to the UK; federal where the UK is unitary, a codified constitution where the UK has none and a unique historical journey including the fight for civil rights and a worrying gun culture.

Teaching uses a range of sources to encourage discussion and debate. Students are also encouraged to learn by doing and taking part in political processes and the schools active Politics Society facilitates this by inviting speakers and providing a forum to discuss current issues.

The Political Ideas paper means the students have a good grounding in political philosophy. This means that as well as developing skills of analysis, interpretation and presenting balanced arguments students also are able to differentiate between key thinkers and their ideas.

Politics is a popular option at this level and offers students a wide range of university and career options. All students will have the opportunity to participate in the department's visit to Washington DC in October 2021.

Entry requirements: Grade 6 in GCSE History or English Language or Literature.

Head of Department: N. Brookes

This course is linear and is broken down into two key components:

Component 1: Technical Principles of Design and Technology:

The theory element is examined across two examinations.

Examination 1: Two and half hours. 120 marks. Contributes 30% towards the overall grade.

The paper examines understanding of Technical Principles based on accumulated knowledge throughout the course.

Examination 2: One and half hours. 80 marks. Contributes 20% towards the overall grade. The paper assesses Designing and Making Principles by questioning Product Analysis skills and Commercial Manufacturing knowledge.

Both are based around short response and longer evaluation style questions.

Overview

- Students will study a wide range of materials/ composition and application; including modern/ smart materials, and processes used in product design and manufacture.
- Student will explore contemporary industrial/ commercial practices applied to manufacturing products, and build an appreciation of the risks involved.
- Students will develop a good working knowledge of health and safety procedures, relevant legislation alongside the use of ICT systems and control.
- Designers from the past will provide inspiration for present and future designing and students will be made aware of the important contribution that key historical movements and figures have on modern design thinking.
- Students will develop an awareness of wider issues in Design and Technology, such as the profound impact of manufacturing practice on the environment and society, and the importance to have sustainability at the forefront of all design thinking.
- Pupils will learn to rigorously apply Mathematical and Scientific principles to their design work.

Component 2: Non Examined Assessment (NEA)

The coursework element revolves around a substantial design, make and evaluate project, graded out of 100 marks and contributing 50% towards the final qualification. The project will consist of a portfolio and a prototype produced under immediate guidance or supervision. The project is student led and is internally assessed then externally moderated.

Overview

- The purpose of this project is to develop students' skills in designing and making a prototype. The term 'prototype' means an appropriate working solution to a need or want that is sufficiently developed to be tested and evaluated (for example, full-sized products, scaled working models or functioning systems).
- Students will work individually and in consultation with a client/end user to identify a design possibility and design context from which they will develop a range of potential solutions, eventually realising one through practical making activities.
- Students are encouraged to develop creativity and imagination when applying iterative design processes to develop and modify designs, and to design and make prototypes solving real world problems, considering others' needs, wants and values.
- There are no limits to project selection beyond the time and resources available and the appropriateness of selection in matching individual students' potential.

- We expect students to take ownership of all aspects of work in this project, adopting a commercial design approach to their work, taking total control of their responses and targeting assessment criteria effectively to maximise their achievements.
- Mathematical and scientific principles applied when considering pupils designs and the designs of others.

Key Mathematical skills taught:

- Calculation of quantities of materials, costs and sizes and ratios/ scaling drawings.
- Calculation of surface areas/ volume and determining quantities of materials.
- Use of trigonometry, calculation of sides and angles as part of product design.
- Construction, use and/or analysis of graphs and charts to inform decisions, evaluate outcomes, presentation market data and user preferences.
- Use of coordinates, geometry and datum points when setting out design drawings.
- Confident percentage/ percentile calculations and statistics/ probability as a measure of likelihood. Interpret statistical data to determine user need/ preference.
- Use data related to human scale/ proportion to determine product scale/ dimension.

Key transferable skills gained through studying Design Technology at A level:

Cognitive skills:

- **Non-routine problem solving** – expert thinking, metacognition, creativity.
- **Systems and Critical thinking** – decision making, reasoning, analysis, synthesising.
- **ICT literacy** – access, manage, integrate, evaluate, construct and communicate.

Interpersonal skills:

- **Communication** – active listening; oral, written and assertive communication.
- **Relationship-building** – teamwork, trust, intercultural sensitivity, social influence.
- **Collaborative problem solving** – establish and maintain shared understanding and team organisation.

Intrapersonal skills-

- **Adaptability** – ability and willingness to cope with the uncertain, different personalities, communication styles and cultures.
- **Self-management and self-development** – work autonomously, be self-motivating and self-monitoring.

The majority of our students progress to further study in Architecture, Engineering or Design

Entry requirement: GCSE grade 6 in DT or GCSE grade 6 in Art/ Graphics/ Textiles.

In exceptional circumstances pupils may be admitted to the course who can demonstrate an aptitude towards and passion for Product Design having not studied the subject at GCSE, providing they have made the basic sixth form entry requirements.

Head of Department: A. J. McGinty

Psychology is the scientific study of people, the mind and behaviour.

Unit H567/01: Research Methods 1x 2hr exam

Planning, conducting, analysing and reporting psychological research across a range of experimental and non-experimental methodologies and techniques.

This unit is designed to give students some practical experience of psychological research. They have the opportunity to carry out a range of practical exercises involving experiments, observations, self-reports and correlations. The unit examination involves multiple choice questions, a research design and response and data analysis and interpretation.

Unit H567/02: Psychological Themes through Core Studies 1x 2hr exam

This unit uses easily accessible examples of psychological research to introduce students to the five core areas of the subject. These are:

Cognitive psychology which includes the study of the basic characteristics of memory and attention; social psychology which includes the study of the concepts of responses to people in authority and responses to people in need; developmental psychology which includes the study of external influences on children's behaviour and moral development; biological psychology which includes the study of the regions of the brain and brain plasticity, and; the psychology of individual differences which includes the measurement of differences and an understanding of disorders.

Within each area, the learners are required to examine four core studies. These core studies are paired together around key themes. For each key theme, the learners need to examine both a classic and a contemporary study. The unit examination involves questions on the core studies, areas, perspectives and debates and also practical applications.

Unit H567/03: Applied Psychology 1x 2hr exam

Issues in mental health

This unit explores issues such as the historical context of mental health, the medical model eg: a genetic or biochemical explanation and treatment of mental illness, and alternatives to the medical model such as a cognitive explanation and treatment.

Sport and Exercise Psychology

This unit explores issues such as personality and sport; motivation; arousal and anxiety in sport: benefits of exercise and mental health and social influences in sport such as audience effects. Each area is evidenced using psychological research and strategies that are used by psychologists to improve performance.

Criminal Psychology

This unit explores issues such as what makes a criminal and the collection and processing of forensic evidence; collecting evidence through interviews and the psychology of the courtroom; crime prevention and the effect of imprisonment.

It is assessed through a written examination where the unit examination involves short answer and extended response questions.

Opportunities include:

Visiting speakers – eg: Brain day and psychopathology day with Dr Guy Sutton Nottingham University medical school. Psychology society including conference trips to see leading psychologists such as Elizabeth Loftus and Philip Zimbardo.

Progression routes include:

Chartered psychologist, medicine, business and finance, health, education, management, criminology and forensics, sport psychology, social and welfare.

Entry requirements: Grade 6 in GCSE Mathematics and GCSE English Language or Literature plus grade 6 in GCSE Combined Science or equivalent in separate Science.

Head of Department: J. Leonard (Watford grammar School for Girls)

General information

Sociology is the academic study of social behaviour, its origins, development, and institutions; in other words, it is the study of people. Sociology is a subject that will challenge your preconceptions and encourage you to question the society in which we live; it is an essay-based study that requires excellent powers of interpretation and analysis. Lessons include discussion, essay writing, debating and other activities aimed at encouraging students to view the world through a variety of lenses.

Links

Sociology is a comprehensive subject that compliments other social sciences and humanities as it will enhance your analytical and evaluative skills. We cover a wide range of topics that are relevant to several other A-Level subjects such as RS, History, English, Psychology and Government & Politics. For those who are studying Maths or Science, Sociology is a great 'all-rounder' that will broaden your skills set and provide you with an in-depth knowledge of the issues facing contemporary society.

A-Level Sociology is useful for those who are interested in career in research, law, journalism, politics, social work, teaching and charity work, amongst other things.

Topics

Core themes in Sociology include socialisation, social differentiation, power and stratification.

Year 1

Education- Who does it benefit? Why are certain individual more likely to succeed in education? Do educational policies benefit all of us equally?

Research methods- how do sociologists conduct social research? What are the strengths and weaknesses of different research methods?

Culture and Identity- what are the main influences on our identities? How can we argue that the self is socially constructed? Who decides what is considered 'high' culture?

Year 2

Global Development- how can we address global inequality? How helpful really is aid? Why is gender such an important source of global inequality?

Crime and deviance- why are certain groups more likely to commit crime? How can we prevent/control crime? How has globalisation affected crime?

Sociological theory- what are the main sociological theories? Is Marxism still relevant? Why can feminists not agree with each other?

<http://www.aqa.org.uk/subjects/sociology/as-and-a-level/sociology-7191-7192/introduction>

Entrance Requirements: Grade 5 in English Language.

Head of Department: N. Twyford

During the course, you will improve your fluency in the language by listening to, discussing and reading authentic, contemporary Spanish. Students have individual speaking lessons with the Spanish Assistant on a weekly basis.

A-Level: Code 7692

The A-Level course will cover:

- **Aspects of Hispanic society**
- **Artistic culture in the Hispanic world**
- **Multiculturalism in Hispanic society**
- **Aspects of political life in Hispanic society**
- **Grammar**
- **Literature and Film**

The A-Level specification has 3 units:

Unit	Outline	Weighting
Paper 1	<p>Listening, Reading and Writing Candidates will answer a range of questions based on approximately 5 minutes of heard material and on a selection of written stimulus texts. All questions are in Spanish, to be answered with non-verbal responses or in Spanish.</p> <p>Translation into English (a minimum 100 word passage) Translation into Spanish (a minimum 100 word passage)</p>	50%
Paper 2	<p>Writing and Grammar Candidates will write 2 300 word essays from a choice of 2 set texts, or 1 set text and 1 film (that will have been studied during the 2 years)</p>	20%
Paper 3	<p>Speaking Candidates will have completed an individual research project that they must then discuss. Candidates must be prepared to discuss one of the 4 sub-themes (aspects, multiculturalism, artistic culture or political life)</p>	30%

Entry requirements: The minimum requirement is grade 6 (grade 7 preferred) at GCSE level. A sound knowledge of Spanish grammar is essential.

The Fourth Option

All students will select THREE subjects from the list above. All students will then need to choose a FOURTH Option. **If you have a minimum of 60 points from your best 8 GCSE grades**, you may select a fourth option from the list of subjects above. You can also select Further Mathematics (see below).

Further Mathematics

Examination Board: Edexcel

Head of Department: P. Matthews

The Further Mathematics course is challenging and is aimed at students who gain at least a Grade 8 in GCSE Mathematics, alongside one of the additional requirements set out below. The AQA Level 2 Certificate in Further Mathematics, studied in Year 11 at Watford Grammar School for Boys, is the ideal preparation for studying Further Mathematics in the Sixth Form, but the requirements below are such as not to exclude those who didn't have the opportunity to take this qualification.

Those studying Further Mathematics cover the A Level Mathematics content at an accelerated pace in Year 12, before moving onto A Level Further Mathematics. It is not an option to drop Further Mathematics once the A Level Mathematics content has been covered, as students are required to study at least three A Level subjects in both Year 12 and Year 13. The examinations for both Mathematics and Further Mathematics are sat in Year 13.

A Level Further Mathematics takes many of the concepts covered in A Level Mathematics further, as well as introducing students to some of the key areas in higher level mathematics. It is ideal preparation for mathematics-rich degree courses, such as Mathematics, Engineering, Computing, Economics and the Sciences.

Component	Outline Content	Weighting
1	Mandatory Core Pure Mathematics 1 : (1 ½ hour paper) Proof, complex numbers, matrices, further algebra and functions, further calculus, further vectors, polar co-ordinates, hyperbolic functions, differential equations, trigonometry.	25%
2	Mandatory Core Pure Mathematics 2 : (1 ½ hour paper) Any of the pure mathematics above.	25%
3	Further Statistics 1 : (1 ½ hour paper) Discrete probability distributions, Poisson and binomial distributions, geometric and negative binomial distributions, hypothesis testing and central limit theorem	25%
4	Further Mechanics 1: (1 ½ hour paper) Work, energy and power, elastic strings and springs and elastic energy, elastic collisions in one dimension, elastic collisions in two dimensions, impulse and momentum	25%

Entry Requirements:

Further Mathematics is only offered as a fourth A level and therefore students must have reached the threshold of 60 points from their best 8 GCSE grades. Students must have selected Mathematics as one of their other A levels. Additionally, one of the following criteria must have been met:

- Grade 8 in both GCSE Mathematics and Level 2 Further Mathematics (or equivalent).
- Grade 9 in GCSE Mathematics.

In exceptional cases, students who achieve a Grade 8 in GCSE Mathematics but who don't meet the above criteria may be considered if they achieve a sufficiently high score in a test at the beginning of Year 12 (students who do not obtain the requisite score will study Mathematics but not Further Mathematics). An A* at IGCSE will be deemed equivalent to a Grade 8.

All Students will sit the test at the beginning of Year 12 and will be expected to meet the minimum pass

mark.

All other students will have the choice of studying for an EPQ, a MOOC or Core Mathematics. See below for details.

Extended Project Qualification (EPQ)

Board: AQA

Teacher in charge: C. Howard

Coursework

The Extended Project will develop and extend from one or more of your study areas and/or from an area of personal interest or activity outside your main programme of study. It will be based on a topic chosen by you and agreed as appropriate by the department.

This option gives you the opportunity to continue studying a subject area you may have been unable to choose as part of your A Level choices or to demonstrate an interest in a specific specialism related to your preferred course / career path post-18.

Delivery of the Extended Project Qualification involves some teaching of the necessary skills, supervision and assessment of your progress. It will involve extended autonomous work by each student.

Students are required, with appropriate supervision, to:

- choose an area of interest
- draft a title and aims of the project for formal approval by the centre
- plan, research and carry out the project
- deliver a presentation to a non-specialist audience
- provide evidence of all stages of project development and production for assessment.

How will you be assessed?

Coursework & Live Presentation - 100%: all coursework will be submitted at the end of Year 12 for submission in the November entry.

How is it graded?

The Extended Projects are graded A* to E with UCAS points awarded as below:

A* 28

A 24

B 20

C 16

D 12

E 8

MOOC (Massive Open Online Course)

<https://www.futurelearn.com/courses/categories>

<http://www.open.edu/openlearn/free-courses/full-catalogue>

A MOOC is a course provided online by various around the world – see above links. These courses allow you to study a topic of particular interest to you or your particular career path. Lessons take place alongside the EPQ lessons where you are taught some of the necessary skills. Thereafter, you are free to follow a series of MOOCs. You will be provided with a list of MOOCs which have proved popular and which the school can recommend. You will be expected to keep records of your study which will be useful for reference in university applications and future careers.

Examples of some of the MOOCs studied:

Digital marketing

Making Sense of Data in the Media

Explore Filmmaking: from Script to Screen

International affairs – Globalisation

Future of farming

Environmental Justice

Bookkeeping for personal and business accounting

Core Maths

Examination Board: AQA

Head of Department: P. Matthews

AQA Level 3 Certificate in Mathematical Studies

As an alternative to an EPQ/MOOC, students studying for three A Levels (which don't include Mathematics), may study Core Maths. This increasingly popular qualification carries the same weight as an AS Level for universities that require "UCAS Tariff points" (a top grade would score 20 points for both, compared with 56 points for an A Level). It is taught for 2 hours a week over the 2 years of the Sixth Form. The course is designed for students for whom an A Level in Mathematics may not be suitable, but who recognise the benefit of strengthening and developing the mathematical knowledge and skills they have learnt at GCSE. The skills gained are readily applicable to the problems that they will encounter in their other A Level courses, further study, employment and everyday life.

The following statements have been given in favour of this relatively new qualification:

Core Maths can be a valuable qualification to support students studying biology, business, chemistry, geography, health and social care and sociology... According to the Higher Education STEM project, many students arrive at university with unrealistic expectations of the mathematical and statistical demands of their subjects, leading to a lack of confidence and anxiety by the students. – “Core Maths – the story so far”, Michael Anderson, STEM Learning Ltd., April 2018

[Core Maths] qualifications are suitable for students intending to follow various routes into higher education, vocational training or business and industry. For example, they could provide a grounding for students entering higher education in subjects such as geography, history or biology, for those choosing vocational training, for example in construction, leisure and tourism or hospitality and catering, for those undertaking teaching qualifications, or for those planning to do apprenticeships, such as in the manufacturing industry. – Report from the ACME expert panel, October 2013

Russell Group universities value mathematics skills for many different degree courses and many have GCSE or equivalent requirements. Mathematical and statistical problem solving, data analysis and interpretation skills can be useful for a wide variety of undergraduate degrees, and a Core Maths qualification may help you to improve and maintain these skills, especially if you are not taking AS or A-level Maths/ Further Maths. – Russell Group Informed Choices Report 2016/17

The AQA course is assessed by two 90 minute papers and has the following content:

Compulsory content:

Analysis of data, Maths for personal finance, Estimation, Critical analysis of given data and models

Optional content (at least three of these must be studied):

The normal distribution, Probabilities and estimation, Correlation and regression, Critical path and risk analysis, Expectation, Cost benefit analysis, Graphical methods, Rates of change, Exponential functions

Entry Requirements: Any student admitted to the Sixth Form may study Core Maths, although it is best suited to students who achieved a Grade 6 or 7 in GCSE Mathematics (or equivalent).

Friday Lecture and Activity Programme

A variety of distinguished visitors regularly give lectures on a range of contemporary themes. In recent years, speakers have included, from the political field, Duncan Hames MP, [REDACTED], Lord Pannick and US Ambassador Matthew W Barzan, from the scientific field Dr Guy Sutton and writer and broadcaster Susan Watts, and from the field of Arts and Culture, Laura Bates and Michael Rosen.

Amongst the themes covered in the lecture programme are:

The European Community	Industry and Commerce
Government and Politics	Human Rights
The Armed Forces and Defence	Religion
Law and Order	Charities
Health	International Affairs
The Environment	Sport, Music and the Arts

The activity sessions involve debating, problem solving and discussions.

Drama, Music, Clubs and Societies

A wide variety of activities is open to members of the Sixth Form who are encouraged to become involved both as participants and as organisers of events. We are very fortunate to have a wealth of resources on site, including a specialist Music Centre, a Theatre, a Sports Hall and Fitness Room, as well as excellent Art and Technology facilities. There are many musical groups including symphony orchestras and jazz ensembles and teams in a variety of sports. Amongst the activities available are the following:

Basketball	Drama	Music	Table Tennis
Chess	Duke of Edinburgh	Reading Groups	Tennis
Classics Society	Golf	Religious Societies	Young Engineers
Cookery	History Society	Rugby Football	Young Enterprise
Cricket	Hockey	Squash	Young Scientists
Debating	Maths Club	Swimming	

The Sixth Form Support Scheme

Members of the Sixth Form are encouraged to help in the education of younger students in assemblies and in the efficient running of the school. Traditionally there has been a Workshop Support Scheme for students in need of support or guidance in an aspect of their work. More recently growing numbers of students are assisting staff in lessons, contributing greatly to the effectiveness of study, and learning many of the skills of teaching and classroom management. Outside of the school we have a good relationship with the local hospital where students can volunteer. These activities, allied to the Prefectorial and House systems, contribute much to the success of the School and enrich the CVs of all who participate.

The Sixth Form Study Centre

Our Sixth Form Study Centre, refurbished 2017, provides extensive accommodation for both collaborative and silent study. Students are asked to follow an agreed code of conduct in the use of these facilities. The Fuller Memorial Library is also available for private study, in which students are expected to work in silence.

Reports and References

The school keeps in close contact with parents throughout a student's career. Parents are invited to contact form tutors or subject staff at any time if there are matters of concern. Reports of academic progress, attendance and behaviour are available to parents online and are updated at regular intervals. In the Sixth Form, there are four parents' evenings organised as in the calendar below. It is expected that members of the Sixth Form will attend these with their parents. Below is the current schedule:

Lower Sixth	September March	Welcome and Information Evening Parents' Evening
Upper Sixth	December	Parents' Evening

The information gathered from reports, test grades and particularly Lower Sixth UCAS examination results form the basis on which UCAS references for University entrance are written, as well as the general contribution to School life. We want to write the most supportive reference that we can: it will be up to the student to supply us with the evidence on which we can do this.

Careers and Higher Education

Progression into Higher Education or a Career requires careful preparation and planning. Within the School advice is available from Form Tutors, subject teachers and the UCAS team, as well as a programme of talks from specialists in a wide range of career fields. The Careers Library is situated in the Fuller Memorial Library and it carries a comprehensive stock of reference literature, a selection of prospectuses and some basic job information, backed up with a variety of careers software.

University Application Calendar

The following calendar of activities is arranged to assist students with their preparations. UCAS predicted grades will be based on student's performance in the end of year 12 "UCAS" exams.

Lower Sixth		Upper Sixth
September		UCAS applications open
October		School's internal UCAS deadline Careers interviews for employment
January		UCAS entry closes January 15th A Level Trial exams
February	Lecture 'Entering Higher Education' Higher Education Funding talk	Funding application forms available
March	Lecture 'The UCAS System'	
May/June	UCAS exams	A Level exams
July	Complete UCAS preparation	
August		A Level results UCAS Clearing

Administration

All members of the school are required to abide by the School Rules and the School Code, the generality of which is given in the 'Home-School Agreement' signed at the beginning of the Lower Sixth by all parties. Whilst the former have been kept to a minimum the following basic requirements are made of all students in the Sixth Form.

1. Attendance

- (i) Attendance at School must be for the published termly dates and at the appointed times.
- (ii) Attendance at all lessons is required.
For Lower Sixth students all non-contact periods are to be taken in the Sixth Form Centre or Library, unless specifically directed by staff to study elsewhere. Attendance at study periods is obligatory and unauthorised absence from these sessions will be treated in the same way as missing a lesson.
- (iii) Experience shows that excellent attendance is linked to high achievement at A level. To show the importance we attach to this matter the following guidelines have been determined:
 - a) 100% attendance is the principal aim. Absence should only be for legitimate reasons such as illness.
 - b) Less than 95% attendance, for whatever reason, is considered unsatisfactory and parental contact will be made.
 - c) Persistent unsatisfactory attendance is considered grounds for exclusion.

2. Absence

Reasonable requests for leave of absence are treated with consideration. Driving tests, University Open Days, medical appointments etc. are all legitimate reasons for absence but we do expect to be asked permission in advance of the event and to receive a covering note from parents. University Open Days occur throughout the year. It is important that students make full use of such opportunities, but must restrict the number of visits to three only during school time.

3. Registration

Sixth Formers attend a registration period between **8.30** and **8.40am**. Afternoon registration takes place in lessons or via our fingerprint registration for study periods. Year 13 students only are free to study at home in the afternoon if they have no further commitments to the school after lunch.

4. Sixth Form Assembly

Assembly takes place every Wednesday morning in the Main Hall at **8.40am**. There is also a bi-weekly briefing for each year group. Attendance at both these sessions is obligatory.

5. Sixth Form Lecture Programme

The Sixth Form Lecture Programme takes place on Friday afternoon; students should be in the School Hall by **2.00 pm**. Attendance is obligatory.

6. Lateness

- (i) arrival at the registration period later than **8.35 am** is recorded as 'late'. There is a disciplinary procedure for persistent lateness.
- (ii) arrival at or beyond **8.50 am** requires registration at the Front Office where the time of arrival and the reason for the lateness will be recorded and later transmitted to form tutors. Students are to report to their Form Tutor by the end of break.

7. Dress

Professional office wear should be worn, ie. a suit or a tailored jacket with shirt, tie and brown or black leather shoes. Casual wear is not acceptable. Pullovers must be of smart appearance and should be plain. They must show the knot of the tie. No item of jewellery should be worn to or at school. This includes all earrings, studs and sleepers.

8. Health

Smoking or vaping is not allowed on or near the School premises. Possession of illegal drugs will be reported to the Police without exception.

9. Part-time employment

Many students engage in some part-time employment both to earn money and gain work experience for their CVs. It is important to recognise that such work can lead to a conflict of interest with School responsibilities. As guidance for parents and students to achieve a sensible balance in this matter, the following guidelines have been determined.

- (i) Part-time employment should not exceed one day (10 hours) per week as a maximum. Experience shows that commitment beyond this commonly leads to adverse effects on studies.
- (ii) Student's first responsibility is to the school. This includes any sporting, musical or disciplinary commitments at weekends.
- (iii) No part-time employment may be undertaken during the school day. When students have no lessons at school in the afternoons they may study at school or at home but must be able to make themselves available if required.

10. Cars

Fully qualified drivers may drive to School provided that permission has been given by the Assistant Head (14-19 Pastoral). There are no facilities available for parking on the School site.

11. Sport

Selection to represent the School should take priority over other commitments.

APPENDIX A - Learner Agreement

16-19 INDIVIDUAL LEARNING AGREEMENT

Date of agreement 1/9/19

The purpose of this agreement is to focus students, parents and the school on the essentials for success.

You will be assigned a form tutor and are expected to attend a weekly tutorial programme lasting 125 minutes per week. In addition you are required to attend a weekly sports activity lasting a minimum of 60 minutes per week; if chosen, you will be required to represent the school. You will also attend the school's Sixth Form Lecture enrichment programme which is timetabled for 60 minutes per week.

Your attendance, punctuality and progress will be closely monitored and you will receive regular feedback and advice on how to fulfil your academic potential in each subject. Where there are concerns about your progress you will be offered appropriate support by the relevant subject department, or, where there are more serious concerns about your progress, relevant measures implemented by the Sixth Form Pastoral team.

In addition to your form tutor and subject teachers, you will be supported by your Head of Year, the Sixth Form Pastoral Officer, a member of staff with responsibility for UCAS applications and an Assistant Headteacher. You are also provided with suitable facilities in which to study. The Sixth form study centre and the Library provide environments conducive to focused, productive activity.

Your weekly tutorial programme with your form tutor, occasionally supported by time in the Friday afternoon lecture programme, will include provision for the development of your study skills. The school will also endeavour to offer relevant guidance and support to assist in the planning of your future, including a detailed programme of UCAS support and the provision of careers advice through assemblies, the lecture programme and other planned events.

You will also be offered opportunities to develop leadership skills, whether as a prefect, through the Route 1-2-1 programme, through sport or through involvement in other extra-curricular activities.

You will be expected to comply with all School Policies, which are available on the school's website www.watfordboys.org.

In line with our requirements to keep you safe your parents are responsible for authorising absence.

All students are expected to provide some kind of "community service" to the school or wider community.

You will sit internal exams in May/June of Year 12 and the results of these will inform the A level predictions which we provide to the universities to which you apply.

To realise my potential and to be in a position to attend this school.

- I will attend school diligently and expect to achieve 100% attendance
- I will ensure that I am punctual to school registrations and to all of my lessons
- I understand that the weekly tutorial and lecture programme are also an important part of the school curriculum and I will attend those faithfully
- I will comply with the school's expectations about my presence on site during the school day and my use of study periods
- I will wear my ID badge at all times when on the school sites.
- I will undertake some form of "community service"
- In line with school's expectations I will complete an academic journal
- I will work alongside my teachers and form tutor to ensure that I fulfil all of my obligations both in and out of lessons
- I understand that as well as attending my timetabled lessons I will be expected to undertake wider independent study.
- I will ensure that my behaviour complies with the current school Behaviour, Online Safety and Classroom codes, details of which can be found on the school website or in the school diary.
- I will not behave in any way that will bring the good name of the school into disrepute
- I understand that if I am achieving results which are significantly below my target grade I will be interviewed by the school in order to consider the need for support and further challenge

Signed: _____
